EXTRUDER CUTS DOWNTIME BY 50%

CASE STUDY

Our customer in Mississauga, Ontario - Amhil Enterprises, Ltd. - has demonstrated that by switching from a liquid purging agent to using **Dyna-Purge X** to clean their extrusion equipment, they can **cut downtime by 50%**. As well, they were able to **reduce purging costs from C\$178.50 to C\$133.25 - a cost savings of 25%!**

In addition, Amhil's machine operators have reported a more thorough cleaning with Dyna-Purge than the liquid purge they previously used. For more details about Amhil Enterprises and more purging success stories, please go to www.dynapurge.com, click on ABOUT US, then click on CASE STUDIES.

Amhil Enterprises was using a liquid purging agent to purge 10 lines of extrusion equipment three times a month. After switching to Dyna-Purge X, as demonstrated by Process Supervisor, Sukhdev Brar, Amhil now completes purging in 30 minutes, instead of taking one hour. Call us today to learn how you can improve cleaning performance and save time and money with Dyna-Purge!

MULTI-PRODUCT BLANKETS

In January, 2004, we implemented a "Multi-Product Blanket" program for all of our customers who opened new blankets or renewed their existing blankets. This exclusive program allows a single location to blanket more than one grade of Dyna-Purge and combine the quantities to attain the lowest price available. All of our primary Dyna-Purge products are eligible for a Multi-Product Blanket. Please ask your Sales Consultant for details. We'll be glad to answer any questions and help you **set up this money-saving blanket program.**
